

Abstract

An adhesive sheet composed of a thermoplastic and optionally one or more resins, wherein

- 5 a) the adhesive system has a softening temperature of greater than 65°C and less than 125°C,
- b) a melt flow index (ISO 1133) of greater than 3 and less than 100 cm³/10 minutes,
- c) a storage modulus G' at 23°C, as measured by test method A, of greater than 10^7 Pas,
- 10 d) a loss modulus G'' at 23°C, as measured by test method A, of greater than 10^6 Pas,
- e) and a crossover, as measured by test method A, of less than 125°C.
